

The Transnational Project Meeting of the AISE Project (An artificial intelligent platform to support students by assessing their performance skills through predictive models created from their writing skills) took place in Limassol, Cyprus, on 30–31 October and 1 November 2025. The meeting was hosted by the C' TESEK Limassol with the participation of all project partners from Greece, Cyprus, Serbia, and Croatia.

The AISE project aims to develop an innovative Artificial Intelligence platform that supports the assessment of students' skills through the analysis of their written work, using machine learning and predictive algorithms. During the meeting, partners:

- Reviewed project progress and deliverables.
- Presented the AISE platform, datasets, and Automatic Essay Scoring (AES) techniques (WP2).
- Discussed the implementation of Retrieval-Augmented Generation (RAG) methods for multilingual data (WP2).
- Planned the educational pilot study (WP3) in schools across the four partner countries.
- Outlined dissemination activities (WP4) through the website, social media, and upcoming conferences.

A new partner, CARNET (Croatia), was also introduced, joining the consortium to strengthen dissemination and educational implementation.

The meeting concluded with the evaluation of the project's progress and planning of the next steps, including pilot testing and evaluation of the AISE platform in partner schools.

The AISE Project is co-funded by the Erasmus+ Programme of the European Union under grant agreement 2023-1-EL01-KA220-SCH-000157157, coordinated by the Directorate of Secondary Education of Preveza (Greece).
